

Product Notice RF#160610: XCTU update to v. 6.3.1

Date: 06/10/2016

Product: XCTU Configuration and Test Utility

Notice:

Digi's Configuration and Test Utility Software has been updated to version 6.3.1. The 6.3.1 release contains a hot fix update of XCTU of bug fixes and minor enhancements. XCTU is an industry leading multi-platform application designed to enable developers to interact with Digi RF modules through a simple-to-use graphical interface.

XCTU 6.3.1 can be downloaded for free on the [XCTU](#) product page at www.digi.com/xctu or can be updated through the help section within XCTU. The complete list of new features and bug fixes can be found in the 'Change Log' within XCTU.

Updates:

XCTU 6.3.1 includes following changes:

- Added support for the 802.15.4 protocol in the S2C 802.15.4 modules .
- Fixed a bug that was causing the API Console to stop parsing frames after receiving a 'Many to one Indicator' frame.
- Improvements in the Frames Generator tool:
 - Updated the list of supported frames in the XTend (DigiMesh) protocol.
 - Protocols are sorted alphabetically now.
- Fixed a bug that was causing XCTU to execute the recovery process incorrectly during a remote firmware update.
- Performed some improvements to adjust XCTU controls based on the size of the texts:
 - XCTU controls now fit the size of the texts they contain.
 - Some dialogs within XCTU are now resizable.

Additional Information:
